# Low-Income Housing Tax Credit Equity Pricing per Credit

January 2016-December 2017

This low-income housing tax credit equity pricing chart is presented for general information purposes only. Per credit equity pricing is based on syndicator Letter of Intent (LOIs) provided to Novogradac & Company LLP by market participants. The equity price reported for each month is the average equity price for LOIs issued in that month. No adjustments to equity pricing are made for timing of capital contributions or other considerations. Data labels are rounded to the nearest cent.

This analysis is not adjusted for:

- Adverse effects on investor demand for the LIHTC as a result of the new base erosion and anti-abuse tax and the increase in after tax rates of return from taxable investments
- Effects of an anticipated increase in the volume of secondary market transactions
- Reentrance of Fannie Mae and Freddie Mac into the market
- Reduced size of the annual equity market

## State And District Fact Sheets

The ACTION state and district show the impact of the Housing Credit in every congressional district, including the number of affordable apartments created or preserved, the jobs that Housing Credit development supports and other benefits to local economies. For the first time, the fact sheets also provide information on the affordable housing crisis in each state, underscoring the vast need for the Housing Credit. See our [National Fact Sheet](#) showing the impact of the Housing Credit throughout the U.S.

### THE NEED FOR AFFORDABLE HOUSING

Though the Housing Credit has had a tremendous impact in California, much more affordable housing is still needed to meet the growing demand.

In California,  
**1.72 million households**

pay more than half of their monthly income on rent, leaving too little for other expenses like health care, transportation and nutritious food.

And in California, a minimum wage worker has to work  
**118 hours per week**  
in order to afford a modest one-bedroom apartment.

The ACTION Campaign represents over 2,000 organizations and businesses working to address our nation's severe shortage of affordable rental housing by supporting the Low-Income Housing Tax Credit.

**The Housing Credit is a proven solution to help address the affordable housing crisis.**

The Housing Credit is our nation's most successful tool for encouraging private investment in affordable rental housing. It has financed over 3 million apartments nationwide since 1986, providing roughly 7 million low-income families, seniors, veterans, and people with disabilities homes they can afford.

Without the Housing Credit, it would be financially infeasible for the private sector to build affordable homes for the families that need them most.

The ACTION Campaign calls on Congress to:

- **Protect** the Housing Credit in tax reform.
- **Preserve** multifamily Housing Bonds, which provide critical financing to roughly 40 percent of Housing Credit developments.
- **Expand** the Housing Credit to make a meaningful dent in our nation's severe shortage of affordable housing.
- **Strengthen** the Housing Credit by making it more streamlined and flexible.
