

Local Water Supply Projects in the San Fernando Valley

Informational Hearing on the LA River Senate Committee on Natural Resources and Water

December 13, 2013

The Los Angeles River: L.A.'s Original Water Supply

Today, L.A. Depends on Imported Water

Increasing Water Supply Reliability

Two Important LADWP Initiatives:

Local Water Supply Reliability

L.A.'s Water Reliability 2025

Securing new local water supplies

SFB Groundwater Remediation Program

Ensuring safe drinking water that meets all regulations

Local Water Supply Projects Have Multiple Benefits

Pacoima Spreading Grounds Project

Main Stormwater Capture Project Categories

Centralized Stormwater Capture

Larger scale projects designed to facilitate groundwater recharge through spreading grounds

Distributed (Decentralized) Stormwater Capture

Smaller scale projects, collecting runoff in local neighborhoods or on an individual residential level

Hansen Spreading Grounds

Rain Barrel/ Cistern/ Rain Garden Rainwater Harvesting Projects

Elmer Avenue Retrofit

Cisterns - Lowe's

Rainbarrel

Cistern

Importance of Stormwater Capture

- Sustain & increase groundwater levels
- Offset potable uses
- Environmental benefits: Flood control / Reduce peak flows
- Other societal benefits

Water Conservation Works!

Fiscal Year Ending June 30

Recycled Water and the LA River

Donald C. Tillman Water Reclamation Plant

Los Angeles-Glendale Water Reclamation Plant

Recycled Water and the LA River

Recycled Water for Groundwater Replenishment

GWR is a Joint Project of LADWP and LA SAN
